Recent Developments

We are in the process of finalizing our financial results for the nine-month period ended September 30, 2014. Based on preliminary information, our revenue for the nine-month period ended September 30, 2014 is expected to be approximately \$269 million, a 75% increase compared with approximately \$154 million for the nine-month period ended September 30, 2013. We expect to report a loss before income tax in the range of approximately \$7 to \$9 million for the nine-month period ended September 30, 2014, compared with a profit before income tax of approximately \$9 million for the nine-month period ended September 30, 2013. Our loss attributable to the company for the nine-month period ended September 30, 2014 is expected to be in the range of approximately \$13 to \$15 million, compared with approximately \$22 million profit attributable to the company for the nine-month period ended September 30, 2013. Our cash available for distribution for the nine-month period ended September 30, 2014 is expected to be approximately \$28 million, all of which was generated during the three-month period ended September 30, 2014, compared with no cash available for distribution for the nine-month period ended September 30, 2013. We have not completed the process of reviewing our financial results for the three-month period ended September 30, 2014 and, accordingly, such information is subject to change. The aforementioned results are generally in line with our expectations and budgets, so we are on track to accomplish our targeted levels of cash available for distribution.
